

JACQUELYN MARCELLA

Front end developer with a passion for JavaScript, CSS, and React.
Clear communicator due to experience in resource management.
Thrives in creative spaces and has a deep appreciation for UX/UI.

EXPERIENCE

General Assembly · *Web Development* · Nov 2017 to Feb 2018

- ▶ Built several full stack web applications individually and in a team using CRUD operations, RESTful routing, and version control.
- ▶ Used pair programming, wireframing, and Agile methods during project sprints.

PROJECTS

Dreamstate · *React.js, MongoDB, Express.js, Node.js, Material UI, AWS API*

- ▶ Collaborated to develop a MERN stack app that helps users understand their dreams through data visualizations and keyword analysis.
- ▶ Responsible for user interface development, mobile and responsive development, data scraping, and implementing CRUD routes through React and Mongo.

Plant Parenthood · *Node.js, Express.js, PostgreSQL, SCSS, Semantic UI, Mocha*

- ▶ Built a Node web application with a SQL database of 200+ houseplants that allows users to easily save and track care information for their plants.
- ▶ Implemented testing through Mocha and Chai.
- ▶ Improved the user experience by translating data into an intuitive icon system.

Skin/Care · *React.js, MongoDB, Express.js, Node.js*

- ▶ Created a MERN stack app that empowers users with sensitive skin to understand connections between cosmetic products and potentially irritating ingredients.
- ▶ Developed scalable React components that allow users to easily add and edit from the Mongo database with minimal clicks.

ADDITIONAL EXPERIENCE

Avanade Digital Studio · *Traffic Manager* · Apr 2016 to Nov 2017

- ▶ Facilitated project staffing and managed operations for 150 cross-functional resources in four locations.
- ▶ Increased chargeability 20% by finding creative solutions to maximize utilization.

Rusty George Creative · *Traffic Manager* · Apr 2011 to Apr 2016

- ▶ Built processes to improve workflow and accuracy in timelines.
- ▶ Partnered with the development team to input content into WordPress.
