📍 Seattle, WA

Front end developer with a deep appreciation for the design process. Clear communicator due to experience in resource and project management

EXPERIENCE

General Assembly · *Web Development · Nov 2017 to Feb 2018*

▸ Built several full stack applications individually and in a team environment using CRUD operations, RESTful routing, and version control.
▸ Used whiteboarding, wireframing, and Agile methods during project sprints.

PROJECTS

Dreamstate · *React.js, MongoDB, Express.js, Node.js, Material UI, Recharts*

▸ Collaborated to develop a MERN stack app that helps users understand their dreams through data visualizations and keyword analysis.
▸ Responsible for front end and responsive development, data scraping, and implementing CRUD routes through React and Mongo.

Plant Parenthood · *Node.js, Express.js, PostgreSQL, jQuery, Semantic UI*

▸ Built a Node app with a SQL database of 200+ houseplants that allows users to easily save and track care information for their plants.
▸ Designed an icon system that simplifies care data to improve the user experience.

The Skincare Project · *React.js, MongoDB, Express.js, Node.js*

▸ Created a MERN stack app that empowers users with sensitive skin to understand connections between their cosmetic products and potentially irritating ingredients.
▸ Developed scalable React components that allow users to intuitively add and edit from the Mongo database with minimal clicks.

ADDITIONAL EXPERIENCE

Avanade Digital Studio · *Traffic Manager · Apr 2016 to Nov 2017*

▸ Facilitated project staffing for 150 cross-functional resources in four locations.
▸ Collaborated with project leads to craft well-rounded teams based on skills match and team dynamics.

Rusty George Creative · *Traffic Manager · Apr 2011 to Apr 2016*

▸ Created and monitored all project timelines to meet client expectations.
▸ Built processes to improve workflow and accuracy in timelines.
▸ Partnered with the development team to input content into WordPress.

SKILLS

Front End
HTML, CSS, JavaScript, jQuery, React.js, Bootstrap, Materialize, Semantic UI

Back End
Node.js, Express.js, MongoDB, PostgreSQL, Python

Version Control
Git, Github

Team Management
Timeline Management, Budget Estimation, Chargeability Forecasting, Trello

Design Tools
Adobe Photoshop, Adobe Lightroom

EDUCATION

General Assembly · *2018*
Web Development Immersive

School of Visual Concepts · *2017*
HTML & CSS

University of Puget Sound · *2011*
BA. Business & Communications

AWARDS

GA UX/WDI Hackathon · *2018*
Most Innovative
